Software Engineer: Front End Developer

Software engineer who creatively solves problems to deliver seamless user experiences. I strive to understand people, technology, and how they interact to build useful applications/features. The goal is to help others bring their ideas to life through technology, helping them reach customers and grow.

WORK EXPERIENCE

Junior Software Engineer | Pedra CRM LLC | Miami, FL 06/2021 - Present

Building CRM system for existing API

- Currently working on an iOS app with SwiftUI and Apollo as my GraphQL client which provides the same functionality as the web application. (iOS)
- Designing of 10+ Views performing queries with persisted user authorization via session tokens. (iOS)
- Built payment feature on web application to process transactions and store users' payment information in a secure manner. (Web Next.js)
- Using GraphQL to query and mutate data with over 20 query/mutation endpoints resulting in 3 features moving into production. (Web Next.js)
- Learning about business logic for CRMs to give said features an intuitive feel, allowing users to create, modify or delete at many instances within their pipeline. (Web Next.js)

Marketing + Operations Consultant | TD LUX | Miami, FL 11/2018 - 04/2021

Led marketing, inventory, and operations projects

- Collaborated with the marketing team on 1-2 monthly campaigns to drive traffic towards our online platforms, resulting in 15% increase in online orders during COVID
- During Covid-19 peak: tasked with redesigning one of the locations. Created floor plans, renderings and designed new furniture. This resulted in 20% more square footage, which allowed us to provide guests with a safe dining experience.
- Created a process to track inventory and maintenance requirements across 6 restaurants allowing the business to efficiently repair or replace machines resulting in no down time.

Architectural Assistant | Archimia | Miami, FL

07/2017 - 07/2018

Created and modified architectural drawings

- Authored 10 renders based on a residential project the firm was overseeing, resulting in the selection of materials/finishes which fit within the budget and satisfied clients aesthetic demands.
- Designing for over 800 hours in Revit. Contributed to 6 projects of which 4 I saw to completion.
- Sourced information from FBC & IBC to satisfy ADA, easement & egress, setback, FAR standards. Through proper implementation the business made fewer trips to the city for approval which improved delivery times.

EDUCATION + CERTIFICATION

Full Stack Web Development Bootcamp

01/2019 - 01/2020

Bottega University, Utah (Remote)

Technologies used: JavaScript, HTML, CSS, Node.js, Express.js, React, Redux, MongoDB
